- **Programming Language** C, C++, Python (Basic), Java (Basic), Kotlin
- **Web Development** HTML, CSS, PHP, XML
- **Database** MySQL, SQLite, Firebase Database
- **Other Software** NetBeans, Umbrello, Xampp, Eclipse, Android Studio
- **Operating System (worked on)** Windows XP / 7 / 8 / 10, LINUX (Ubuntu), Android

Experience:

- **Experience of Internship for 3 months at Kohli Media LLP, Mohali, Punjab as an Entry Level App Ninja(Android Application Developer).**

Academics Projects:

Minor Project Title: Automated Adverse Road Condition Detection System.

- **Front End:** XML
- **Back End:** Kotlin, Firebase Cloud Services
- **Database :** Firebase Firestore
- **Development Environment:** Android Studio
- **Project Description:** The proposed system is the solution for Minimizing Road accidents occurring due to Unmarked speed breakers, big path-holes. The system will be a real-time application which display speed breakers and path-holes so that the driver will be aware of

them and can avoid such incidents.

Major Project(Currently Working On): Face Recognition based Attendance System.

- **Front End:** Tkinter(Python)
- **Back End:** Python
- **Database :** Mysql
- **Development Environment:** Pycharm (Community Edition)
- **Project Description:** The proposed system is the solution for teachers or other industries where attendance plays a very important role. The user just have to register students or employees and has to capture a good image of everyone of them solely. Then for generating attendance he just have to upload a single group pic and he will get a generated cvs file with attendance of employees or students present in image.
